

The logo graphic consists of several overlapping, semi-transparent geometric shapes in shades of teal, green, and white, creating a layered, 3D effect.

infraserve
Flexible Agile Scalable Technology

**AppLogic as a Service.
Deploy your applications, your way.**

CA AppLogic - Deploy your applications, your way.

Reduce your delivery costs by up to 90%.
Get the full benefit of the cloud without the
need to alter your applications.

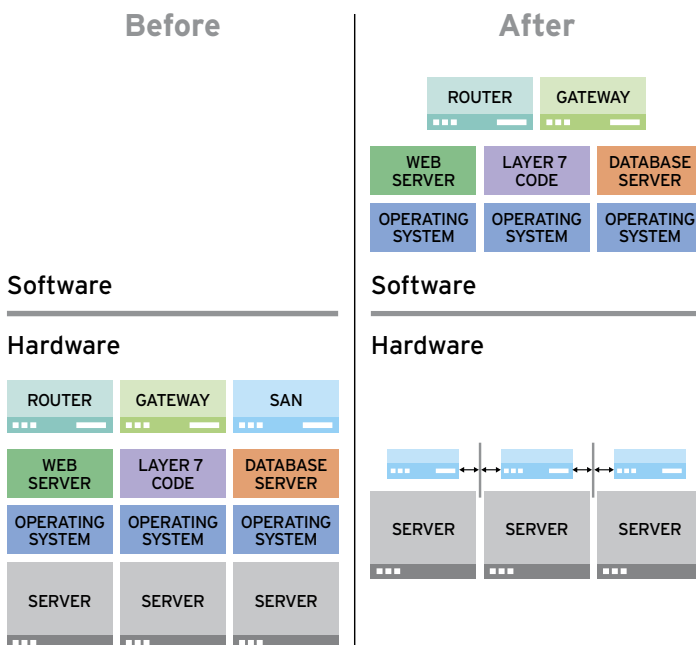

Your applications in the cloud. Easy.

Now you can deploy your applications,
faster and more cost effectively than ever
before, all with a single click.

Infraserve's AppLogic as a Service lets you deliver
and manage your applications, all for a fixed price
and within a fixed time frame. One Click deployment
means you can change the end user experience and
make your software available as a service in the
cloud - without the need to modify the application.

Through our exclusive alliance with CA Technologies,
your application software becomes a Virtual
Business Service available globally.

More software. Less hardware.

Flexible and affordable.

Now you can deliver your software as you
intended. Once your master template is
created, you can deploy your application
quickly and affordably, through your own
personal cloud.

Our unique pay-per-use model allows you to scale
your application. You can grow your capacity, over
time, in direct response to demand. You're in control
every step of the way.

Applications can be
replicated for a new
customer or moved to
another geographical
location, in just hours.

Applications can be replicated for a new customer
or moved to another geographical location,
in just hours. By removing the dependency on
infrastructure, Infraserve lets you deliver your
application to new customers in minutes instead
of months.

Your applications, your way.

This is your Virtualised Business Service, delivered your way.

Infrastructure and application are treated as a single object. Services become easier to start, stop, copy, scale, backup and move geographically with single commands.

If you'd rather spend more time developing applications and less time configuring them, you should talk to us...

Infraserve provides you with the copy and paste simplicity to deploy your application for each new customer. Instantly! If you'd rather spend time developing applications instead of configuring them, talk to us.

Contact details

To set up an appointment, please call one of our well informed sales team on:
Tel: 1300 816 866
Email: contact@infraserve.com.au

Twitter: @infraserve

Our head office is located at:

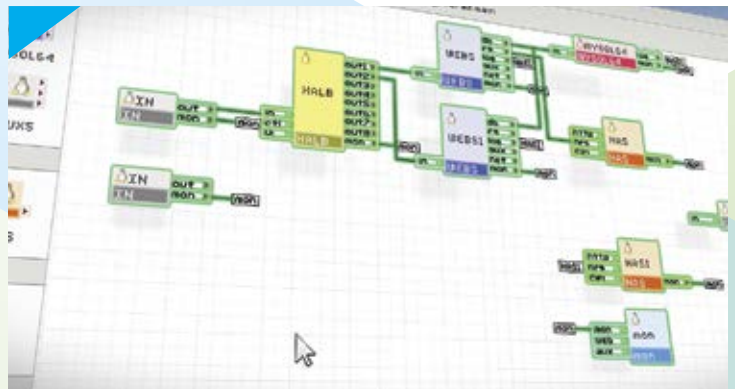

10-12 Wharf Crescent,
Pyrmont NSW 2009

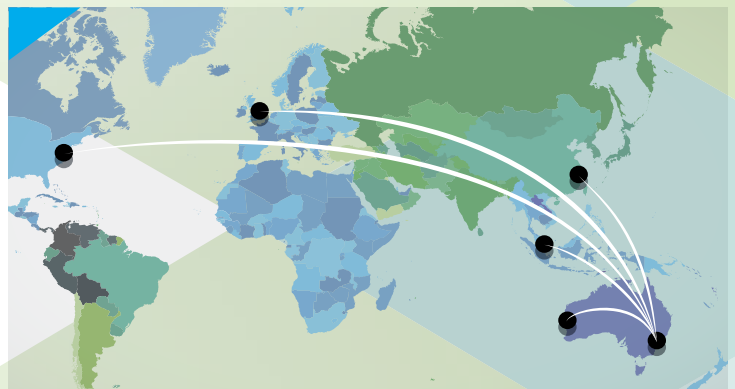

Your application and the infrastructure needed to run it, is treated as a single object. This is now a Virtualised Business Service.

Easily replicate the Virtual Business Service for another customer, instantly!

Your application and all its infrastructure become a single, easily managed entity. No need to manage each application instance separately, making it easy to do updates and enhancements regardless of where the application is deployed globally.

Have your application hosted in another state or country instantly. Simply transfer your VBS to another AppLogic grid whilst maintaining it centrally, providing a local presence without the high cost to do so.

Reach your market with a single click.

If you want to get your application out there, faster and more cost effectively than ever before, we'd like to hear from you. Call us on +61 2 4355 5150 or visit our website at infraserve.com.au for more information.

Speaking from experience.

Don't just take our word for it. Here's what AppLogic users have to say.

Very quickly we have been able to ramp up new revenue streams and win new customers with even higher expectations and more complex needs.

Stephen Hurford
DNS Europe

Now we have all our expertise focused in one country and manage data centres across the globe more securely and reliably from a single location.

David Corriveau
CTO of Radix Cloud

Using AppLogic has allowed us to provide our partners and their clients a 45-55% savings over a traditional model of delivering and managing applications in-house. It also allows us to start up our service in new geographic regions without us having to set up the operations from scratch saving us a lot of time and money.
